Summary

Full-Stack Software Engineer with 3+ years of experience building production web applications with Python (FastAPI), React/Next.js, TypeScript, and PostgreSQL. Experienced in REST API and database schema design, JWT/OTP authentication, caching, and Docker, working in distributed Agile teams. Research background in federated learning; hands-on experience building LLM-powered applications.

Technical Skills

Languages: Python, TypeScript, JavaScript, HTML5, CSS3, C++

Backend & Data: FastAPI, Node.js, Express.js, REST APIs, Socket.io, Prisma, PostgreSQL, MySQL

Frontend: React.js, Next.js, Tailwind CSS, Flutter

Auth & Security: JWT, OTP authentication, refresh-token rotation, role-based access control

Tools & AI: Git, Docker, CI/CD, Jira, Unit Testing, Agile/Scrum, LangChain, LLM applications

Professional Experience

Software Engineer

May 2023 – Present

The WOS Germany GmbH, Mönchengladbach, Germany

Remote

- Developed and maintained **15+ production features** for [Lenthocom](#) using Flutter and Next.js, serving **5,000+ daily active users** across web and mobile platforms
- Optimized **REST API performance** by eliminating redundant calls and implementing caching strategies, **reducing average response time by 40%**
- Designed and implemented **secure OTP-based authentication** system with session management, **improving user login success rate by 25%**
- Established **code review standards** and **QA protocols** across a 6-member distributed team, **reducing production bugs by 30%**

Software Development Intern

October 2022 – November 2022

Diligite Limited, Chittagong, Bangladesh

- Built 5+ reusable React.js UI components for a file-sharing app, improving code reuse and maintainability
- Collaborated via Git, Jira, and Agile workflows including sprint planning and code reviews

Education

B.Sc. in Computer Science & Engineering

July 2023

Chittagong University of Engineering and Technology (CUET)

CGPA: 3.21/4.00

Undergraduate Thesis: Federated learning optimization using Laplacian Smoothing SGD combined with FedNova, evaluated on CIFAR-10.

Projects

Collaborative Team Hub

[GitHub](#)

[Live Demo](#)

Express, Next.js, PostgreSQL, Socket.io

- Built and deployed a real-time, multi-tenant workspace platform: an 11-module Express REST API with Swagger docs, a Next.js/React frontend, and a 14-model PostgreSQL schema (Prisma)
- Implemented JWT auth in httpOnly cookies with hashed refresh-token rotation, role-based access control, and rate limiting; shared Zod validation across API and frontend
- Delivered live presence and notifications via Socket.io, optimistic UI with rollback, and an append-only audit log written in the same transaction as each change

Marketplace Workflow System

[GitHub](#)

FastAPI, PostgreSQL, Next.js, Docker

- Designed and built a Docker monorepo (FastAPI backend, PostgreSQL, Next.js frontend) under a tight production deadline
- Wrote requirements and technical specs before coding, enabling clear task breakdown and parallel development
